RegNet
International Regulatory Net (or RegNet) provides a coordinated service that enables you to comply with regulatory obligations globally. Businesses of all kinds find it increasingly challenging to cope with the flood of new, complex regulation and changes in the way in which it is enforced. As regulators become more willing to take strong enforcement action, it has never been more important to ensure compliance. Our RegNet solution builds on the success of our global fund distribution service (International Funds Net) and draws upon our market understanding, depth of resource and innovative approach to information technology to provide you with a seamless solution.

Meeting your requirements
The service is flexible to your needs and we tailor a solution for your specific requirements. We can provide:

- a clear and managed process for coordinating regulatory advice across multiple jurisdictions to ensure regulatory compliance
- information management to help you organise responses to regulatory queries
- document filing and assistance
- if required, we would be happy to organise translations of any documents

Recent examples of RegNet projects include coordinating advice in relation to:

- document retention policies for a global bank in 12 countries
- business-to-business lending for a multinational telecommunications corporation in 10 countries
- payment services and electronic money regulation in over 40 countries relating to the introduction of new payment systems by a global airline trade association
- change of control requirements for a global investment management company in 52 countries
- website disclaimers for insurance and investment management companies in 30 countries
- financial promotions for insurance and investment management companies in 38 countries
